OBJECTIVE

Passionate and motivated Computer Science undergraduate Student with intermediate-level skills in Python Development, Data Science, Machine Learning, and AI fundamentals. Experienced in using modern AI tools, tech-based platforms, and vibe coding practices to enhance productivity, automation, and problem-solving. Seeking opportunities to apply technical knowledge, gain industry experience, and contribute to innovative real-world projects.

WORK EXPERIENCE

Dec 2025 - March 2026

NovaXcelerate - OnCampus Internship

Completed a 3-month on-campus Data Science internship focused on data analysis, model training and data visualization.

Collaborated with peers on technical learning activities, problem-solving tasks and Decision Making

Arch Technology - Remote Internship

May 2025 - July 2025

Completed a remote internship focused on Data Science, Machine Learning, AI, and NLP fundamentals. Learned the basics of data preprocessing, data cleaning, EDA, and model workflows

Worked with different Data Science tools and technologies including Python, Jupyter Notebook, Pandas, and NumPy

WORKSHOPS & SEMINAR

Participated in a workshop on Google AI Studio & Antigravity Tools conducted by NUXUS Pakistan in collaboration with Hazara University

May 2026

Attended a seminar on Entrepreneurship journey and the role of NIC Lahore,organized by HULT Prize HU

April 2026

Completed a workshop on Blockchain Development using Algorand Python SDK,

June 2024

EDUCATION AND TRAINING

BS Computer Sciences - Hazara University

Sept 2023 - July 2027

Currently pursuing a degree in Computer Science with focus on Data Science, Artificial Intelligence, and Machine Learning. Developing analytical and problem-solving skills through academic projects and practical learning

CERTIFICATIONS

What is Data Science & Artificial Intelligence By Coursera.

Python for AI, Data Science & Development By IBM.

HTML, CSS, and JavaScript for Web Developers By Coursera.
